

Sep-Art Artemia Cysts

General information

The Sep-Art Technology is based on an ingenious aquaculture invention. Sep-Art Artemia cysts are not a new strain of cysts, but the Sep-Art Technology provides a magnetic coating on the cysts. This new technology is highly efficient and allows a fast and complete separation of nauplii and unhatched cysts. Sep-Art Artemia Cysts (90% hatching) are coated with a carefully selected non-toxic layer of magnetic material. They look like normal cysts and the hatching instructions are identical. After hatching the Sep-Art Artemia Cysts, drain or siphon the nauplii and unhatched cysts into the Sep-Art Separator. The Separator contains a strong built-in magnet: unhatched cysts are trapped by the magnet on the bottom of the Separator. The non-magnetic free swimming nauplii are ready to use. Thanks to the gentle separation process, the nauplii are extremely viable.

Ingrediënts

Artemia Cysts

Could be used for these groups of fish

Nano Reef, Dwarf Cichlids, Angels, Angels - Pygmy Angels, Livebearers, Shrimps, Pipefish, Shrimps, Damsels, South-American Cichlids, Tetra's, Seahorses, Rainbow Fish, Angels, Danio's, Mandarins - Cardinals, Hawkfish, Victoria Cichlids, Cichlids, Soft Corals, Razorfish, Invertebrates, Mollies, Discus, Gobies, Barbs, Discus - Angels, Blennies, Barbs - Tetra's - Rasbora's, Surgeonfish, Seahorses - Razorfish, Mandarins, Hard Corals, Tanganyika Cichlids, Crustaceans, Anthias, Gobies - Blennies, Rasbora's, Crabs, Cardinals, Shrimps - Crayfish - Crabs, Malawi Cichlids, Damsels - Anthias, Clownfish, Butterflyfish, Killifish, Crayfish, Guppies, Platies, Pygmy Angels, Swordtails
